

GLOBAL SUCCESS 12 • UNIT 3

Unit 3 [GREEN LIVING]

I. VOCABULARY

Hệ thống từ vựng trọng tâm theo chủ đề kèm phiên âm chuẩn, định nghĩa và ngữ cảnh minh họa

1 Waste and Recycling (18 words)

**waste**

/weɪst/

(n): rác thải, sự lãng phí

**landfill**

/'lændfɪl/

(n): bãi chôn lấp rác

**decompose**

/ˌdi:kəm'pouz/

(v): phân hủy (tự nhiên)

**packaging**

/'pækɪdʒɪŋ/

(n): bao bì đóng gói

**container**

/kən'teɪnə/

(n): hộp đựng, đồ chứa

**cardboard box**

/'kɑ:rdbɔ:rd bɑ:ks/

(n): thùng các-tông, hộp bìa cứng

**single-use**

/ˌsɪŋgl 'ju:s/

(adj): dùng một lần

**takeaway container**

/'teɪkəweɪ kən'teɪnə/

(n): hộp đựng thức ăn mang đi

**recyclable**

/ˌri: 'saɪkləbl/

(adj): có thể tái chế

**recycle**

/ˌri: 'saɪkl/

(v): tái chế

**reuse**

/ˌri: 'ju:z/

(v): tái sử dụng

**reduce**

/rɪ 'du:s/

(v): cắt giảm, giảm thiểu

**contaminated**

/kən'tæmɪneɪtɪd/

(adj): bị nhiễm bẩn, bị ô nhiễm

**rinse out**

/rɪns aʊt/

(phr.v): súc sạch, rửa sạch

**sort waste**

/sɔ:rt weɪst/

(v): phân loại rác thải

**separate garbage**

/'sepəreɪt 'gɑ:brɪdʒ/

(v): phân tách rác

**rubbish bin**

/ˈrʌbɪʃ bɪn/

(n): thùng rác (thường)

**recycling bin**

/ˌriːˈsɑːklɪŋ bɪn/

(n): thùng rác tái chế

2 Eco-friendly Habits and Lifestyle (15 words)

**green living**

/ɡriːn ˈlɪvɪŋ/

(n): lối sống xanh

**eco-friendly**

/ˌiːkəʊ ˈfrendli/

(adj): thân thiện với môi trường

**environmental awareness**

/ɪnˌvaɪrənˈmentl əˈwɛrnəs/

(n): nhận thức về môi trường

**carbon footprint**

/ˈkɑːrbən ˈfʊtprɪnt/

(n): dấu chân carbon (lượng khí thải carbon)

**natural resources**

/ˈnætʃrəl ˈriːsɔːrsɪz/

(n): tài nguyên thiên nhiên

**sustainable**

/səˈsteɪnəbl/

(adj): bền vững

**zero waste**

/ˌziːrəʊ ˈweɪst/

(n): lối sống không rác thải

**green energy**

/ɡriːn ˈenəˌdʒi/

(n): năng lượng xanh

**reusable bottle**

/ˌriːˈjuːzəbl ˈbɑːtl/

(n): bình nước dùng nhiều lần

**reusable cup**

/ˌriːˈjuːzəbl kʌp/

(n): cốc dùng nhiều lần

**glass jar**

/ɡlæs dʒɑːr/

(n): lọ thủy tinh, hũ thủy tinh

**metal straw**

/ˈmetl strɔː/

(n): ống hút kim loại

**refill**

/ˌriːˈfɪl/

(v): làm đầy lại, rót đầy lại

**turn off**

/tɜːn ɔːf/

(phr.v): tắt (thiết bị điện)

**waste of electricity**

/weɪst əv ɪˌlekˈtrɪsəti/

(n): sự lãng phí điện năng

3 Composting and Organic Waste (8 words)

compost

/ˈkɑːmpoust/

(n): phân trộn, phân hữu cơ

compost pile

/ˈkɑːmpoust paɪl/

(n): đống ủ phân hữu cơ

household waste

/ˈhaʊshəʊld weɪst/

(n): rác thải sinh hoạt gia đình

garden waste

/ˈgɑːrdn weɪst/

(n): rác vườn (cành cây, lá khô, cỏ xén)

fruit peel

/fruːt piːl/

(n): vỏ trái cây, vỏ hoa quả

leftovers

/ˈleftəʊvəz/

(n): thức ăn thừa, phần ăn còn lại

layer

/ˈleɪə-/

(n): lớp, tầng (vật liệu)

chemical fertiliser

/ˈkemɪkl ˈfɜːtəlaɪzə-/

(n): phân bón hóa học

4 Environmental Issues and Pollution (9 words)

air pollution

/er peːˈluːʃn/

(n): ô nhiễm không khí

greenhouse gas

/ˈgriːnhaʊs gæs/

(n): khí nhà kính

methane

/ˈmeθeɪn/

(n): khí mê-tan

carbon dioxide

/ˈkɑːrbən daɪˈɑːksaɪd/

(n): khí cacbonic, khí carbon dioxide (CO2)

pollutant

/pəˈluːtənt/

(n): chất gây ô nhiễm

wildfire

/ˈwaɪldfaɪə-/

(n): đám cháy rừng, trận cháy dữ dội ngoài tự nhiên

litter

/ˈlɪtə-/

(n): rác rưởi bừa bãi

climate change

/ˈklaɪmət tʃeɪndʒ/

(n): biến đổi khí hậu

harm wild animals

/hɑːrm waɪld ˈæɪnɪmlz/

(v): gây hại cho động vật hoang dã

5 Green Solutions and Community Actions (8 words)

public transport

/ˌpʌblɪk ˈtrænsˌpɔːrt/

(n): phương tiện giao thông công cộng

sensor tap

/ˈsensə ˌtæp/

(n): vòi nước cảm ứng

automatic light

/ˌɑːtə ˈmætɪk laɪt/

(n): đèn tự động (cảm biến chuyển động)

plant pot

/plænt ˈpɔːt/

(n): chậu trồng cây

bird feeder

/bɜːd ˈfiːdə-/

(n): khay đựng thức ăn cho chim, máng ăn cho chim

clean up

/kliːn ʌp/

(phr.v): dọn dẹp sạch sẽ, tổng vệ sinh

care about

/keə ə ˈbaʊt/

(phr.v): quan tâm đến, để tâm đến

in the long run

/ɪn ðə lɔːŋ rʌn/

(idiom): về lâu về dài

II. EXERCISES

Hệ thống 16 dạng bài tập củng cố và phát triển năng lực từ vựng toàn diện

EXERCISE 1 MULTIPLE CHOICE – DIRECT QUESTIONS

- Which of the following describes a site where municipal garbage is buried underground?
 - wildfire
 - landfill
 - layer
 - plant pot
- What happens when organic matter breaks down naturally over time?
 - it decomposes
 - it turns into metal
 - it burns as a fuel
 - it contaminates
- Which term refers to items designed to be thrown away after just one single use?
 - recyclable
 - single-use
 - eco-friendly
 - sustainable
- What should you do to an empty beverage carton before putting it into a recycling bin?
 - freeze it
 - bury it
 - burn it
 - rinse it out
- Which concept measures the total greenhouse gas emissions caused directly and indirectly by an individual?
 - carbon footprint
 - environmental awareness
 - green energy
 - waste of electricity
- What is the dark, nutrient-rich substance produced by decaying leaves and food scraps called?
 - pollutant
 - packaging
 - compost
 - leftovers
- Which potent greenhouse gas is released from decomposing organic food rotting in landfills?
 - nitrogen
 - water vapor
 - methane
 - oxygen
- Which fixture turns water on and off automatically without needing manual touch?
 - glass jar
 - metal straw
 - reusable cup
 - sensor tap

- 9 Which phrase describes discarded pruned tree branches, clipped hedge twigs, and fallen leaves?
 A. garden waste B. chemical fertiliser
 C. cardboard box D. takeaway container
- 10 Which phrase means 'over a long period of time in the future'?
 A. zero waste B. in the long run C. clean up D. green living

EXERCISE 2 MULTIPLE CHOICE – SENTENCE COMPLETION

- 1 Throwing oily food boxes into the paper recycling makes the entire batch _____, which prevents proper processing.
 A. reusable B. eco-friendly C. sustainable D. contaminated
- 2 The eco-conscious cosmetics brand replaced plastic wrap with biodegradable cornstarch _____, which breaks down naturally.
 A. methane B. wildfire C. packaging D. pollutant
- 3 Wind turbines and rooftop solar panels generate clean _____, which reduces our reliance on fossil fuels.
 A. carbon dioxide B. air pollution
 C. green energy D. chemical fertiliser
- 4 Before heading home from the workshop, technicians must _____ all electric heaters to prevent energy waste.
 A. rinse out B. turn off C. care about D. sort waste
- 5 Adding dried banana skins and citrus _____ provides organic potassium to vegetable garden beds.
 A. fruit peel B. rubbish bin C. sensor tap D. bird feeder
- 6 Instead of tossing uneaten dinner into the garbage bin, my roommate packs the _____ into a lunch container for work.
 A. landfills B. pollutants C. leftovers D. layers
- 7 Rising ocean temperatures and shifting rainfall patterns are visible consequences of global _____.
 A. green living B. climate change
 C. natural resources D. zero waste
- 8 Dense toxic smog from vehicle exhausts causes hazardous levels of _____, which triggers respiratory illnesses in cities.
 A. compost pile B. plant pot C. household waste D. air pollution
- 9 Citizens who travel by subway and electric bus choose _____ over private cars, which decreases city traffic jams.
 A. public transport B. chemical fertiliser
 C. takeaway container D. automatic light
- 10 The hotel installed an _____ in each corridor, which automatically illuminates whenever motion is detected.
 A. reusable bottle B. automatic light C. bird feeder D. metal straw

EXERCISE 3 MULTIPLE CHOICE – CONVERSATION COMPLETION

- 1 Liam: "How can I avoid generating so much plastic trash when buying groceries?" Emma:
"-----"
 A. You can purchase heavy chemical fertilisers for your yard.
 B. You should carry reusable canvas bags and produce nets.
 C. You must buy more disposable water bottles every morning.
 D. You ought to toss plastic takeaway containers into rivers.
- 2 David: "Where should I toss this empty soda can and glass bottle?" Sarah:
"-----"
 A. Throw them straight into the organic garden compost pile.
 B. Leave them on the cafeteria table for cleaners to collect.
 C. Drop them into the blue recycling bin beside the doorway.
 D. Bury them under the flowerbed to help fertilise plants.
- 3 Tom: "Would you like to join our neighborhood canal clean up this Saturday?" Chloe:
"-----"
 A. I'd love to join, because I really care about cleaner waterways.
 B. That sounds terrible, as nobody should ever clean up public areas.
 C. I'm afraid I cannot attend since I prefer throwing trash outdoors.
 D. No way, because clearing plastic waste will definitely harm ducks.
- 4 Lucas: "I love your stainless steel water flask! Where did you get it?" Mia:
"-----"
 A. Thanks, but I only keep it as decoration on my living room shelf.
 B. Thanks, though disposable cups are definitely much better to use.
 C. Thanks, but it produces too much harmful methane gas in kitchens.
 D. Thanks, I carry this reusable bottle daily to reduce plastic waste.
- 5 Alex: "Our dormitory electricity bill went up significantly this month!" Rachel:
"-----"
 A. We can install old inefficient light bulbs to increase consumption.
 B. We should keep all ceiling lamps running brightly during daytime.
 C. We ought to open all windows while running the heater on high power.
 D. We must remember to turn off air conditioners before heading out.
- 6 Daniel: "Do you think shopping at zero waste package-free stores is practical?" Sophie:
"-----"
 A. No, since organic food scraps should always go into landfills.
 B. Yes, because buying single-use plastic cutlery is cheaper for us.
 C. Yes, bringing our own glass jars saves packaging in the long run.
 D. No, because sorting garbage increases dangerous toxic pollutants.
- 7 Noah: "Did you hear about the massive wildfire raging in the northern forest?" Grace:
"-----"
 A. Yes, it released huge clouds of carbon dioxide and destroyed trees.
 B. Yes, it safely broke down all household waste into organic soil.
 C. No, burning woodlands is an effective way to conserve resources.
 D. No, wildfires only produce clean drinking water for forest animals.

- 8 Jessica: "What should we do with all these vegetable peelings and melon rinds?" Ben:
"-----"
- A. Let's pour synthetic chemical fertilisers directly on the kitchen floor.
B. Let's flush all fruit peelings down the bathroom sensor tap immediately.
C. Let's toss them into the compost pile instead of the rubbish bin.
D. Let's seal them in non-biodegradable takeaway containers forever.
- 9 Oliver: "Some people leave the restroom taps dripping water all day long." Zoe:
"-----"
- A. Leaving water flowing constantly is a great way to save resources.
B. The building manager should install an automatic sensor tap here.
C. Students must always drink water directly from garden hoses outside.
D. We should encourage everyone to pour dirty wastewater onto desks.
- 10 Sam: "Why are you riding your bicycle to school instead of asking for a ride?" Lily:
"-----"
- A. Cycling burns fossil fuels rapidly, which creates heavy air pollution.
B. Cycling produces zero emissions, which shrinks my carbon footprint.
C. Pedaling to school is dangerous because it harms wild river birds.
D. Riding a bike requires a lot of single-use cardboard packaging boxes.

EXERCISE 4 WRITE THE ENGLISH WORDS FOR THE PICTURES

1 	2 	3 	4 
5 	6 	7 	8 
9 	10 	11 	12 
13 	14 	15 	16 
17 	18 	19 	20 

EXERCISE 5 WRITE ENGLISH WORDS

- 1 tái chế -----
- 2 tái sử dụng -----
- 3 cắt giảm, giảm thiểu -----
- 4 phân hủy (tự nhiên) -----

- | | |
|---|-----------------------------------|
| 5 bao bì đóng gói | 6 thân thiện với môi trường |
| 7 dấu chân carbon | 8 tài nguyên thiên nhiên |
| 9 bền vững | 10 lối sống không rác thải |
| 11 làm đầy lại, rót đầy lại | 12 tắt (thiết bị điện) |
| 13 chất gây ô nhiễm | 14 biến đổi khí hậu |
| 15 phương tiện giao thông công cộng | 16 vòi nước cảm ứng |
| 17 chậu trồng cây | 18 máng ăn cho chim |
| 19 gây hại cho động vật hoang dã | 20 về lâu về dài |

EXERCISE 6 FILL IN THE BLANKS**WORD BOX (TỪ GỢI Ý):**

fruit peel metal straw cardboard box harm wild animals separate garbage reusable bottle plant pot
decompose bird feeder rinse out

- 1 The online bookstore packs every textbook parcel into a sturdy before shipping.
- 2 Fallen maple leaves and organic fruit cores take several weeks to under warm, damp soil.
- 3 Before leaving for soccer training, Minh always fills his stainless steel with cold water.
- 4 You should thoroughly empty juice cartons before placing them into the recycling bin.
- 5 Sanitation regulations instruct residents to into distinct organic and dry rubbish bins.
- 6 Instead of taking a single-use plastic straw for her smoothie, Lan sips through a washable
- 7 Adding discarded orange rind and apple to the compost bin enriches garden soil naturally.
- 8 Grandpa built a wooden and hung it on the oak branch so local birds can feed in winter.
- 9 We painted an old tin can and turned it into a charming for fresh green basil.
- 10 Disposing of plastic rings and fishing nets near natural rivers can seriously

EXERCISE 7 FILL IN THE BLANKS IN THE PARAGRAPH**WORD BOX (TỪ GỢI Ý ĐIỂN ĐOẠN VĂN):**

carbon footprint household waste landfill layer compost single-use green living container
sustainable natural resources

Transitioning towards a lifestyle of (1) _____ is one of the most effective ways to reduce our personal (2) _____. In our neighbourhood, residents decided to eliminate (3) _____ plastics by packing lunches in a durable glass (4) _____ instead of disposable bags. We also started a community garden where food scraps are turned into nutrient-rich (5) _____ rather than being sent directly to the local (6) _____. When maintaining the compost bin, volunteers spread a brown (7) _____ of dried leaves over kitchen leftovers to prevent bad smells. By sorting our (8) _____ carefully every morning, we conserve precious (9) _____ and create a truly (10) _____ environment for future generations.

EXERCISE 8 PUT THE SENTENCES IN THE CORRECT ORDER

- 1 a. a. These panels generate abundant electricity, which directly reduces our dependency on fossil fuel generators.
b. b. This green energy system will save public funds and cut urban greenhouse emissions significantly.
c. c. Our town council approved the installation of high-efficiency solar panel arrays across municipal rooftops.
d. d. The clean power collected during daylight hours is subsequently stored in modern neighbourhood batteries.
A. d-a-c-b B. c-a-d-b C. a-c-b-d D. c-d-b-a
- 2 a. a. Huy: 'Great idea! What organic materials should we layer into the wooden bin first?'
b. b. Huy: 'Where should we build our new compost pile in the school garden?'
c. c. Mai: 'We can begin with dry brown twigs and fallen leaves before adding vegetable kitchen scraps.'
d. d. Mai: 'Near the tool shed under the shady tree would be an ideal spot.'
A. a-c-b-d B. b-a-d-c C. d-b-a-c D. b-d-a-c
- 3 a. a. Ingesting non-biodegradable debris damages their digestive systems and can fatally harm wild animals.
b. b. Marine turtles and seabirds frequently mistake these buoyant plastic fragments for natural food.
c. c. Strictly enforcing package recycling and banning throwaway cutlery can stop this ecological tragedy.
d. d. Millions of single-use takeaway food containers and plastic bottles enter marine environments every year.
A. a-d-b-c B. d-a-b-c C. d-b-a-c D. b-a-d-c
- 4 a. a. Lan: 'I noticed some students leave the bathroom taps running while washing their hands.'
b. b. Lan: 'Do you think our principal will agree to replace them with automatic sensor taps?'
c. c. Minh: 'Definitely, because modern sensor taps cut water wastage immediately and pay for themselves.'
d. d. Minh: 'That is such a terrible waste of water when resources are so precious.'
A. a-d-b-c B. a-b-d-c C. b-c-a-d D. d-a-b-c
- 5 a. a. The collected biogas is then converted into electricity to power local public transport.
b. b. Trapped deep under soil layers, decomposing food waste produces large volumes of combustible methane.
c. c. Urban landfills receive thousands of tons of unsorted municipal garbage each week.
d. d. Modern waste facilities install specialized subterranean piping systems to capture this toxic gas.
A. c-b-d-a B. d-a-c-b C. c-d-b-a D. b-c-d-a

EXERCISE 9 MULTIPLE CHOICE – CLOSEST IN MEANING

- 1 The hotel chain replaced plastic guest amenities with **eco-friendly** alternatives made from wheat straw.
A. environmentally friendly B. artificial
C. expensive D. harmful
- 2 The floodwaters left the village well **contaminated** with untreated industrial chemicals and sewage.
A. crystal-clear B. potable C. purified D. polluted
- 3 Fallen autumn leaves slowly **decompose** in the forest, returning organic nutrients to the woodland soil.
A. freeze solid B. break down C. expand rapidly D. catch fire

- 4 Urban planners are developing **sustainable** communities that rely on renewable solar power and green spaces.
A. temporary B. wasteful C. long-lasting D. destructive
- 5 Households are encouraged to **reduce** their power consumption during peak afternoon hours.
A. cut down B. ignore C. double D. increase

EXERCISE 10 MULTIPLE CHOICE – OPPOSITE IN MEANING

- 1 Consumers should avoid purchasing products that are not **eco-friendly** when shopping for household goods.
A. recyclable B. green
C. harmful to nature D. beneficial
- 2 The chemical spill left the drinking reservoir completely **contaminated**, forcing the city to shut off the water mains.
A. filthy B. infected C. pure and clean D. poisonous
- 3 The campus coffee shop stopped handing out **single-use** plastic cups to customers.
A. reusable B. throwaway C. flimsy D. disposable
- 4 Investing in clean geothermal energy is a **sustainable** solution that will protect our environment for generations.
A. effective B. destructive C. enduring D. renewable
- 5 The international summit urges major industrial nations to **reduce** their annual greenhouse gas emissions.
A. lessen B. cut C. lower D. increase

EXERCISE 11 DICTIONARY ENTRIES
pollutant *noun* /pəˈluːtənt/

Definition: a substance that makes air, water, or soil dirty and not suitable or safe to use

EXAMPLES & COLLOCATIONS:

- Environmental scientists identified plastic microfibers **as a major pollutant** threatening coastal wildlife.
- Heavy vehicle exhaust is recognized as a common **air pollutant** in crowded downtown streets.
- Old thermal power stations can **release a pollutant** into nearby freshwater reservoirs.
- The agricultural inspection team detected a **dangerous chemical pollutant** in the farmland drainage canal.

PRACTICE QUESTIONS:

- (1) Smoggy factory chimneys pump particulate matter into the sky, making it a hazardous _____ that causes lung disease.
- (2) Strict environmental laws prevent manufacturing factories from having the right to _____ into public streams.

decompose *verb* /ˌdiːkəmˈpəʊz/

Definition: to break down gradually into smaller parts through natural, chemical, or biological processes

EXAMPLES & COLLOCATIONS:

- Beneficial soil microbes and earthworms **help decompose organic matter** into nutrient-rich humus.
- Thick cardboard packaging takes several humid months **to decompose slowly** in a backyard garden.
- Most cotton canvas fabrics **can decompose over time** without leaving synthetic toxic residues behind.
- Fruit peelings and dry garden leaves will **decompose naturally** when buried in aerated soil.

PRACTICE QUESTIONS:

- (3) Adding red wriggler worms to your compost barrel will _____ much faster than ordinary aeration alone.
- (4) Dense wooden tree bark requires many rainy seasons _____ beneath the forest floor before turning into rich loam.

sustainable *adjective* /sə'steɪnəbl/

Definition: able to continue or be continued for a long time without damaging the environment

EXAMPLES & COLLOCATIONS:

- Switching municipal bus fleets entirely to electricity **is economically sustainable** over a ten-year operational period.
- Crop rotation and drip irrigation are traditional techniques supporting **sustainable agriculture** in rural valleys.
- Local timber companies are legally required to manage forestry reserves **in a sustainable manner** without clear-cutting.
- Biodegradable seaweed wraps offer an innovative, **sustainable alternative to plastics** for packaging fresh groceries.

PRACTICE QUESTIONS:

- (5) Natural bamboo cutlery provides a durable, _____ when packing takeaway lunches.
- (6) Farmers adopting organic fertilisation and solar water pumps contribute greatly to _____ across the countryside.

container *noun* /kən'teɪnə/

Definition: an object such as a box, bottle, or jar that can be used for holding something

EXAMPLES & COLLOCATIONS:

- Mai washed an aluminium **container for food leftovers** before putting it in her school backpack.
- Customers who purchase package-free detergents must **use a container** brought from home.
- Keep dried pantry herbs and spices in a labelled **storage container** to prevent moisture damage.
- Laboratory researchers placed biological specimens inside a firmly **sealed glass container** on the sterilised bench.

PRACTICE QUESTIONS:

- (7) Shoppers visiting zero-waste bulk grocery stores are asked to _____ rather than purchasing disposable plastic wraps.
- (8) To preserve homemade raspberry jam without spoiling, pour the warm mixture into a _____.

refill *verb* /,ri:'fɪl/

Definition: to fill something again after it has been emptied or partly emptied

EXAMPLES & COLLOCATIONS:

- Modern airport transit lounges provide filtered water stations so passengers can easily **refill bottles** before flying.
- If your metal flasks are empty, you **can refill them** at the hallway drinking fountain free of charge.
- Customers at the neighborhood beverage kiosk are encouraged **to refill cups** rather than requesting disposable mugs.
- Athletes at the marathon finish line quickly **refill containers with water** to rehydrate after running.

PRACTICE QUESTIONS:

- (9) Volunteers setting up the hydration booth at the park marathon must _____ before runners cross the finish line.
- (10) The university cafeteria offers a ten-percent drink discount to students who bring mugs _____.

EXERCISE 12 SIGNS AND NOTICES

What does the sign mean?

- A. Recycling plastic containers is forbidden.
- B. Disposable plastic drinkware is banned here.
- C. You must purchase takeaway drinks in cups.
- D. Visitors are required to discard straws here.

2

What does the sign say?

- A. Pouring chemical pollutants down the drain is strictly prohibited.
- B. Cleaning the storm drainage pipes with water is fully mandatory.
- C. Workers must collect chemical canisters from public drainage grills.
- D. Dumping clean tap water into industrial containers is not allowed.

3

What does the sign say?

- A. You must leave your fabric tote bags outside before purchasing.
- B. Disposable plastic bags will be handed out free at all checkouts.
- C. Packaging items into plastic cardboard boxes is strictly required.
- D. Shoppers are expected to bring their own reusable shopping bags.

4

What does the sign say?

- A. Setting up small campfires near dense trees is officially permitted.
- B. Be cautious because the surrounding woodland faces high wildfire risk.
- C. Campers are required to burn dry fallen pine branches along the trail.
- D. Watch out for forestry workers planting fresh pine saplings nearby.

5

What does the sign mean?

- A. Watch out for flammable methane gas build-up in the landfill area.
- B. Workers must empty compressed gas canisters into organic soil bins.
- C. Caution as industrial gas cylinders are being refilled with water.
- D. Organic fertilizer bags are stored safely inside the facility yard.

What does the notice tell us?

- A. Technicians have turned off the solar battery bank due to electrical faults.
- B. Students must not charge laptops using the building solar power system.
- C. The campus will install new solar panels when conventional power fails.
- D. The hallway lighting is currently powered entirely by solar green energy.

What does the note say?

- A. Watermelon rinds and apples must be stored inside the refrigerator.
- B. The green counter container is intended for non-recyclable garbage.
- C. Mark should deposit his organic fruit scraps into the composting box.
- D. Mai wants Mark to empty the general trash bin before lunchtime today.

What does the email say?

- A. Students are asked to manually turn off hallway lights between lectures.
- B. All campus restrooms will be closed while plumbers test water valves.
- C. Restroom sensor taps have broken down and will undergo repairs soon.
- D. New automated fixtures have been installed to save water and electricity.

What does the notice tell us?

- A. Customers get a beverage discount if they bring a reusable travel cup.
- B. Paper cups are provided at a twenty percent reduction for members.
- C. The café will no longer sell beverages to people without cash cards.
- D. Free coffee will be served to patrons who purchase disposable cups.

10

What does the flyer say?

- A. Local wild birds are being relocated to safety before construction.
- B. The annual clean-up event has been rescheduled due to severe rain.
- C. Volunteers will receive gloves and bags to clear litter from the canal.
- D. Participants must bring their own heavy rubbish bins to the bridge.

EXERCISE 13 WORD FAMILIES

Base Word	Verb	Noun	Adjective	Adverb
recycle (verb)	recycle	recycling	recyclable	—
decompose (verb)	decompose	decomposition	decomposed	—
pollutant (noun)	pollute	pollutant, pollution	polluted	—
sustainable (adjective)	sustain	sustainability	sustainable	sustainably
contaminated (adjective)	contaminate	contamination	contaminated	—
waste (noun)	waste	waste	wasteful	wastefully
packaging (noun)	pack, package	packaging, package	packed	—
reuse (verb)	reuse	reuse	reusable	—

EXERCISE 14 MULTIPLE CHOICE – WORD FAMILIES

- 1 The chemical spill caused severe river _____ that threatened local drinking water supplies.
A. pollute B. pollutant C. polluted D. pollution
- 2 Aluminum cans and glass containers are completely _____ materials that we should never throw away.
A. recyclable B. recycled C. recycle D. recycling
- 3 Many organic farmers strive to manage their acreage _____ to protect soil quality.
A. sustainably B. sustainable C. sustain D. sustainability
- 4 Greasy napkins can _____ an entire batch of clean cardboard during processing.
A. contaminated B. contamination C. contaminate D. contaminating
- 5 Leaving electrical appliances running in empty classrooms is a very _____ habit.
A. waste B. wasteful C. wastes D. wastefully
- 6 Warm summer temperatures accelerate the _____ of organic kitchen scraps in the compost barrel.
A. decomposition B. decomposed C. decomposing D. decompose
- 7 Shoppers who bring their own _____ cloth bags help prevent millions of plastic sacks from polluting oceans.
A. reusing B. reuse C. reusable D. reused
- 8 The delivery service wraps fragile glass bottles in protective paper _____.
A. package B. pack C. packed D. packaging

- 9 Educating young citizens on environmental _____ ensures the long-term protection of natural habitats.
 A. sustain B. sustainability C. sustainable D. sustainably
- 10 Smoke particles from coal-fired power stations act as a dangerous atmospheric _____.
 A. pollute B. pollution C. pollutant D. polluted

EXERCISE 15 SUPPLY THE CORRECT FORM OF THE WORD GIVEN IN EACH SENTENCE.

- 1 Many eco-friendly supermarkets avoid using _____ plastic wrap for fresh vegetables. (WASTE)
- 2 Proper waste sorting increases the proportion of _____ materials sent to recovery plants. (RECYCLE)
- 3 The rapid _____ of discarded vegetable peelings produces nutrient-rich garden compost. (DECOMPOSE)
- 4 Installing rooftop solar panels helps families power their homes _____. (SUSTAIN)
- 5 Tossing oily cardboard into the paper collection causes serious _____ of clean materials. (CONTAMINATE)

EXERCISE 16 TRANSLATION

- 1 Chúng ta nên phân loại rác thải cẩn thận để bảo vệ môi trường.

- 2 Đồ nhựa dùng một lần mất hàng trăm năm để phân hủy tự nhiên.

- 3 Nhiều người mang theo bình nước dùng nhiều lần khi đi học.

- 4 Gia đình tôi ủ thức ăn thừa thành phân hữu cơ, điều này giúp giảm rác thải sinh hoạt.

- 5 Khí mê-tan từ các bãi chôn lấp là một loại khí nhà kính nguy hiểm.

- 6 Bạn nên súc sạch các hộp sữa trước khi bỏ chúng vào thùng tái chế.

- 7 Năng lượng xanh từ gió và mặt trời giúp cắt giảm lượng khí carbon dioxide.

- 8 Tắt các thiết bị điện khi không sử dụng giúp ngăn ngừa sự lãng phí điện năng.

- 9 Học sinh sử dụng phương tiện giao thông công cộng để giảm dấu chân carbon của mình.

- 10 Trường học lắp đặt vòi nước cảm ứng để tiết kiệm nước về lâu về dài.

III. ANSWER KEY & EXPLANATIONS

Bảng đáp án và lời giải chi tiết cho 16 dạng bài tập

EXERCISE 1: Multiple Choice – Direct Questions

1. B 2. A 3. B 4. D 5. A 6. C 7. C 8. D
9. A 10. B

EXERCISE 3: Multiple Choice – Conversation Completion

1. B 2. C 3. A 4. D 5. D 6. C 7. A 8. C
9. B 10. B

EXERCISE 5: Write English words

1. recycle 2. reuse 3. reduce 4. decompose
5. packaging 6. eco-friendly 7. carbon footprint
8. natural resources 9. sustainable 10. zero waste
